

Our role To accompany you throughout your project...

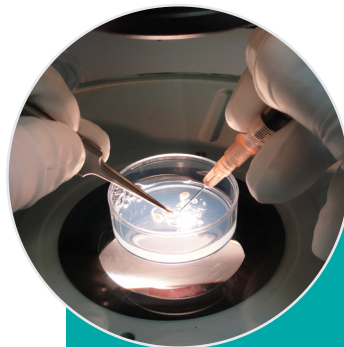

A wide range of rodents and services serving biomedical research

Research models

Dispose of excellence research models

With high health standards, genetic stability and the same microbiota, JANVIER LABS rodent models are recognised as references worldwide.

Reproductive sciences

Recognised expertise

Benefit from the expertise and the latest techniques in cryopreservation and assisted reproduction to guarantee the future of your strains.

Customised breeding

A customised breeding strategy for your strains

Trust our experts to manage your mice and rat models to save time, space and optimise your resources, to enable you to devote yourself to your core business: your research.

Laboratory services

Ready-to-use solutions

Profit from a large range of services in order to accelerate your research: surgically prepared animals, ready-to-use biological products and customised protocols. All the procedures are validated by JANVIER LABS' ethics committee.

... and to facilitate your daily research

In-house transport service

We guarantee what is under our control

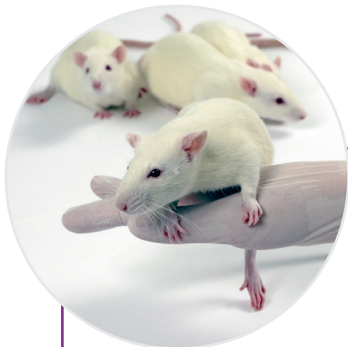

- > Drivers trained and qualified by JANVIER LABS
- > Ventilated and air-conditioned lorries
- > Approved vehicles

Guaranteed availability

Your models always in stock

- > Each strain is bred in several production units
- > Production capacity: 3 million rodents per year

Animal welfare, it's in our genes

Calm and docile animals, easy to handle

- > Small production units for less noise and stress
 - > No mix of species
 - > Socialisation of rodents
 - > Handled manually
- > Optimal transport conditions for animal welfare
 - > Highly qualified staff

A unique site in Europe

No-compromise process and health standards

- > The largest and most advanced rodent breeding site
 - > Multiple health protection barriers
 - > Permanently controlled health flows
 - > Know-how and process expertise
 - > State-of-the art technologies
 - > A continuous innovation policy
 - > Health and genetic analyses carried out externally

Your reliable partner Adaptability and reactivity at each stage of your project

A question ? A project ? Our teams are at your disposal.
